

APPENDIX F

Trail Condition and Use Chart

Trail	Recreational Walking Use	Hiking/Jogging Use	Recreational Mountain Bike Use	Technical Mountain Bike Use	Need for Improvement (M = minor, J = major)	Comments - 3 - 6 ft refers to trail width
A	Y			Y	M	moderate slope, 3-6 ft
B1	Y		Y		J	gentle slope, 3 - 6 ft, wet areas south of C, follows old power line, some abandoned poles
B2	Y			Y	M	moderate/gentle slope, 3 - 6 ft, braids, interesting landscape features (nurse stumps, large boulders)
C	Y			Y	M	follows sewer r.o.w., wet areas, moderate slope 3 - 6 ft
D	Y			Y	J	moderate slope, 3 - 10 ft, braids, trail close to ridge top - concern to safety and erosion, views
D1	Y			Y	M	moderate slopes 3 - 10 ft, braids
D2		Y			J	very steep, goes down bank below ridge, erosion, stairs collapsing
E	Y		Y		M	6 ft +, gentle slope
F	Y		Y		M	gentle/moderate grades, 4 - 15 ft, views along ridge top
G	Y		Y		M	moderate slope, 3 - 6 ft, bridges & culverts, areas of erosion
H		Y		Y	M	steep grades, 4 - 6 ft
I	Y		Y	Y	J	within SFU, same creek crossing need culvert, bridge, existing bridges good condition, gentle to moderate slopes, 3 - 6 ft
J	Y		Y		M	gentle/moderate grades, 3 - 6 ft, steeper/moderate sections near S, 3 bridges a. bridge - good condition, 4' wide, railing, large boulder b. bridge - good condition, 4' wide, railings c. bridge - good condition, 4' wide, small drainage course, no railing
K		Y		Y	M	moderate, 3 ft, narrow and winding, some steeper section difficult to locate entry from University Avenue
L						not identified
M1	Y		Y		M	powerline row, road 10 - 15 ft, gentle slopes, transmission towers, no easy link to M2
M2	Y		Y		M	powerline r.o.w. road 10 - 15 ft, gentle slopes, transmission lines, no easy link to M1

Trail	Recreational Walking Use	Hiking/Jogging Use	Recreational Mountain Bike Use	Technical Mountain Bike Use	Need for Improvement (M = minor, J = major)	Comments - 3 - 6 ft refers to trail width
N, O, V		Y		Y	M	moderate grades, 3 - 5 ft, winding, O. has need of culvert/bridge over small drainage course, N. has existing culvert in need of repair
P	Y		Y		M	Moderate grades; trail width 4-6 ft.; wide r.o.w. clearing with new growth occurring; confusing route / direction at water pumping station; fence and no-post barriers where trailhead meets Gagliardi Way
Q	Y		Y		J	gentle to moderate slopes; 3-6 ft. width; follows edge of cleared r.o.w.; very wet areas requiring ditches and/or trail relocation; number of stream crossings without bridges or culverts; parking / staging for trail access at pull-out along Gagliardi Way; several unattractive utility buildings near North Road
R		Y		Y	J	generally moderate with steep sections; width 3-5 ft.; winding trail; several drainage course crossings; one small log bridge in poor condition
S		Y		Y	J	very steep, 3 - 4 ft, scenic conifer forest
T		Y		Y	M	moderate slope, some drainage needed, close off trail crossing through stream
U		Y		Y	M	moderate slope, 3 - 5 ft
W	Y		Y		J	gentle slope, 3 - 8 ft, trail needs drainage at bottom (east) 2 small drainage courses require culverts or bridges
X	Y			Y		moderate/gentle slopes, 4 - 15 ft, braids, alternate wooded route parallel to North Road & powerline r.o.w. trails
Y	Y			Y		gentle slopes, 4 - 15 ft, braids, alternate wooded route parallel to North Road & powerline trails
Z		Y		Y	J	gentle/moderate slopes, 2 - 4 ft, rough access trail, many wet areas require drainage, several small drainage courses require culvert/bridges
AA		Y		Y	J	steep and winding, 2 - 4 ft, scenic as follows creek ravine, cross creek 3 times, a. upper bridge good condition, b. middle bridge (logs) poor condition, c. lower crossing no bridge (bridge required), trail erosion into creek (trail is located within creek ravine)

Trail	Recreational Walking Use	Hiking/Jogging Use	Recreational Mountain Bike Use	Technical Mountain Bike Use	Need for Improvement (M = minor, J = major)	Comments - 3 - 6 ft refers to trail width
BB		Y		Y	M	moderate slope, 3 - 5 ft, winding
CC		Y		Y	J	moderate slope, 3 - 5 ft, winding, wet areas, 2 small drainage courses require culvert/bridge
DD	Y		Y		J	North Road trail; gentle slope, parallels North Road, 3-15 ft., north end narrows and very wet, follows fence, dead ends
